# Our Story

### IN THE BEGINNING

The story of Rocky Mountain Hardware unfolded over three decades ago in a successful showroom owned by co-founders Mark and Patsy Nickum. Working closely with architects, designers and builders in Sun Valley, Idaho, they furnished high-end doors, windows and door hardware for upscale, custom-built homes.

### BORN FROM OPPORTUNITY

The Nickums quickly realized the need for quality, customized products, as their clients repeatedly asked for pieces that simply didn't exist. They were looking for accessories that would tie their projects together-products with one-of-a-kind character that could be used throughout the entire house to unify the look. Without customized pieces, their clients were settling for something ordinary rather than staying true to the design of the home and making those finishing touches exceptional.

### **NEVER SAY NO**

Whenever a need arose on a project for a particular type of hardware that just couldn't be found, it was created. Starting with one lever and one plate, their clients asked, "Can you do the doorstop?" Their reply? "Sure. We can do a doorstop." The doorstop evolved into a cabinet knob for the kitchen, then on to all the hardware in the bath. Next stop, door accessories and hinges, and finally plumbing and lighting. It comes as no surprise that the Nickum's philosophy of never saying "no" was the inspiration behind the creation of Rocky Mountain Hardware. And that was just the beginning.

### MOVING FORWARD

Today, nearly 30 years later, Rocky Mountain Hardware continues its family tradition with Christian their son at the helm, who has led the company since the early 2000's. Their unwavering commitment to high-quality, custom bronze pieces is unparalleled. The creation of that next sculptural work of art is already in the works. As for the future? They can't wait for the next request.

# Philosophy

### LIVING AND WORKING GREEN

Nestled in the mountains of Hailey, Idaho, Rocky Mountain Hardware's flagship facility is a true testament to their core values. When they decided to expand their company, they started from the ground up-literally. Their goal to design a structure that balanced environmental responsibility with the health and happiness of their employees earned the company LEED® Gold Certification, a high honor granted by the U.S. Green Building Council.

But their dedication to creating a better, greener place goes beyond brick and mortar. Rocky Mountain's philosophies serve as a foundation for how they conduct business—from handcrafting high-quality products, all in the USA, to environmental stewardship and the well being of their employees.

### BALANCING ACT

As family-owned business, they truly understand that every employee is integral to the company's success. They also appreciate how leading a balanced life impacts the bottom line. That's why the company offers little perks that make coming to work fun. There's a gym, horseshoe pit and basketball court in addition to classes for kettlebells, yoga and pilates.

### SUSTAINABILITY

Rocky Mountain Hardware is dedicated to green practices when it comes to manufacturing products, too. Each piece of hardware is cast of 90% post-consumer recycled bronze-a fact which can contribute towards earning LEED® points. All sand used to cast molds is reconditioned on a regular basis for reuse, resulting in zero waste. Bronze chips and grinding dust are also recycled with absolutely no byproduct. And, at the end of the line, each piece is finished in our eco-friendly patina process to create the beautiful hues for which we are known.

Because at Rocky Mountain Hardware, living green is more than just an ideal, it's a way of life.

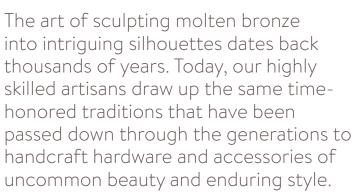

ALL PRODUCTS CAST OF 90% POST-CONSUMER RECYCLED BRONZE. MADE IN THE USA.

## The Art of Creation

Using Old-World casting techniques, each product touches no less than 30 hands, undergoing a rigorous 20-plus-step process that starts in our pattern shop. An expert craftsman begins by hand sculpting imaginative ideas into pattern boards to create casts using sand or wax.

### SAND CASTING

Sand is compacted tightly to both sides of the pattern board. Once set, the boards are removed, and each half of the mold is carefully inspected. The halves are placed back together, forming a cavity to hold the molten bronze.

Next, 300 pounds of bronze ingots are melted in a crucible, reaching a temperature of 2,200°F. The bronze is poured by hand into the casts and left to cool. After cooling, the product is removed and sent on for finishing.

### LOST-WAX CASTING

For designs that are a bit more intricate, the art of lost-wax casting is employed. This process is extremely time intensive as the wax molds are dipped in a ceramic slurry multiple times and must dry completely between each dip. The molds are placed in kilns to harden. Then, hot molten bronze is poured into the cavity. Once hardened, the shell is cracked off by hand to reveal the bronze piece nestled inside.

### STATE-OF-THE-ART MACHINERY

After the casting is complete, each piece moves through a series of steps to add precise functionality. We employ over 30 computer numeric controls (CNC) machines to ensure that the hardware functions flawlessly for a lifetime. These state-ofthe-art computer programs are written to make our machines perform to our exacting specifications. We also have large lathes to turn specific parts, as well as water-jet machines to cut 2D custom parts using high

### **FINISHING TOUCHES**

Once in the finishing facility, the artistry and detail of the pieces are highlighted with a warm, hand-applied patina and hand-rubbed polish. The finish grows richer and deeper over time as it responds to its environment for one-of-a-kind character.

The end product is a sculptural work of art, the handiwork of many, and one that is expertly crafted to last a lifetime.

### Custom

### YOUR IDEA, OUR INSPIRATION

For nearly two decades, Rocky Mountain Hardware has looked to our clients for inspiration. The philosophy to "never say no" is the foundation from which our company was built upon. Today, we continue that tradition, partnering with customers to create one-of-a-kind designs with true artisan appeal.

### **UNIQUELY YOURS**

From small modifications of an existing collection to an original design reimagined in bronze, no project is too big, or for that matter, too small. Whether working from a rough sketch or verbal exchange, our in-house design and engineering team have both the experience and tools to turn every idea into a sculptural work of art.

### **EXACTING PRECISION**

Our team works closely with each client to identify the most appropriate method to create the initial pattern. Our sophisticated 3-D computer modeling program and rapid prototyping machine are often selected to recreate geometric designs. Or, for more organic designs, our skilled artisans hand carve intricate patterns from wood.

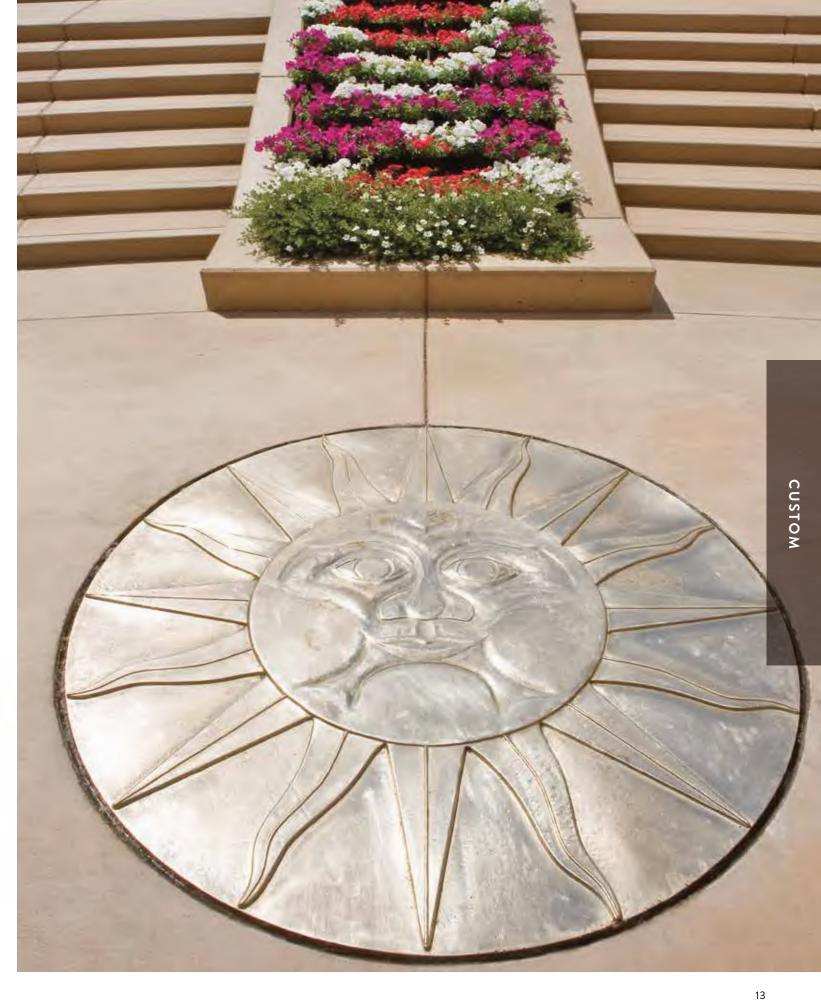

From here craftsmen seamlessly combine Old-World casting techniques—with state-of-the-art precision machinery to achieve a perfect end result, capturing every subtle nuance with exact tolerances.

### ONE-OF-A-KIND CHARACTER

Each piece is given a lustrous, hand-applied patina that responds to time and its environment for a look that's truly unique. We can also match a wide spectrum of finishes beyond the standard 12 offered to complement your existing aesthetic.

TO SPEAK TO A DESIGNER ABOUT YOUR CUSTOM PROJECTS, PLEASE CALL 888-788-2013.

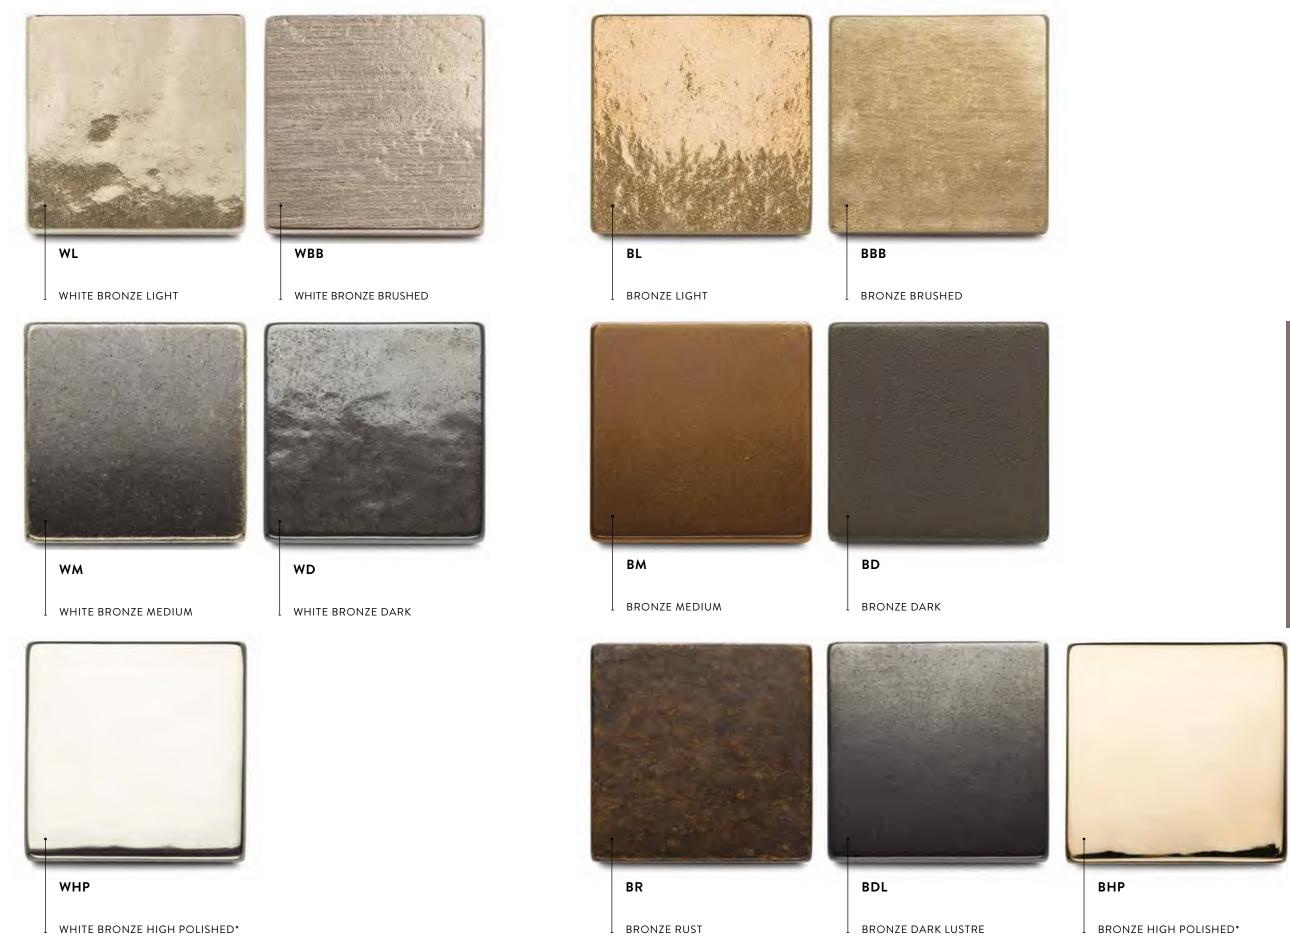

### Patinas

Rocky Mountain Hardware's highly skilled artisans use Old-World casting techniques to handcraft imaginative designs from artgrade bronze of exceptional quality. Each piece begins with one of two base metals—white bronze, prized for its burnished silvery hue or silicon bronze, characterized by its rich coppery coloration.

The artistry of the design is highlighted with a warm and lustrous patina, applied by hand to create a wonderfully aged appearance. A hand-applied wax finish allows each piece to wear beautifully over time, with absolutely no lacquers or coatings used that could potentially chip or peel. The patina responds to its individual environment-time, touch, climate-so that each shade distinctly reflects its surroundings for one-of-a-kind character.

\* UPCHARGE APPLIES 17

OUR ONGOING COLLABORATION WITH

Flute Collection and most recently the Barre and Zeppelin Collections. As former Vice President of Design for Wynn Design and Development, Thomas is known for his luxurious interiors which are grounded in his deep

appreciation of design history.

The Barre collection harmonizes classical and industrial styles to create a series that explores the beauty of architectural simplicity. Influenced by the minimal elegance of a ballet barre and the precise lines of a trained dancer—with a nod to vintage bar rails for further intrigue—the assortment is guided by a graceful restraint with a dash of edge for today's interiors.

Contrary to what the name suggests,
Zeppelin is not inspired by airships. Rather,
the sculpturally faceted design draws its
form from the exquisite melon-shaped legs
that fashioned 1920s furniture. Balancing
distinctive and delicate details—such as
slightly tapered lines, fluted posts and
rounded finials—the intrinsically romantic
collection perfectly portrays Thomas' affinity
for referencing traditional elements as seen
through a contemporary lens.

The Flute Collection, aptly named for the fluted detailing that characterizes ancient Corinthian columns, captures Thomas' affinity for referencing classic architectural elements. Each piece is thoughtfully simple in shape, commanding in scale and textured to the touch.

For the Paris Collection, Thomas based his design in the historical styles from 17th and 18th century France distilled down to its purist form, stripping away extraneous details typical of the era to capture the timeless silhouettes presented in this collection.

All of Thomas' collections include door and cabinet hardware for residential or commercial use.

FLUTE COLLECTION ON PAGES 50-55
PARIS COLLECTION ON PAGES 162-167

"I was drawn to the collaboration with Rocky Mountain Hardware because of the high quality products they produce. They create hand crafted hardware pieces with time honored casting methods. It was a pleasure to work with all the talented artisans and I'm pleased to present Trousdale by Kravitz Design, a collection inspired by modern architecture, mid-century glamour and hand crafted quality."

- Lenny Kravitz, Kravitz Design Inc.

based firm headed by accomplished musician, actor, designer, Lenny Kravitz, teamed up with Rocky Mountain Hardware to create Trousdale, a dynamic door and cabinetry collection that adds a refreshing modern aesthetic to Rocky Mountain's portfolio. Inspired by the architecture of the famed Trousdale Estates neighborhood in Beverly Hills, California—an enclave of mid-century modern homes that was put on the map in the 1950s and 60s by its

celebrity residents—the series features sleek

KRAVITZ DESIGN INC., THE NEW YORK-

architectural elements with angular profiles and a strong textural effect. Trousdale marks Kravitz Design's first foray into the hardware category, and typifies Kravitz's own personal edgy and elegant point of view for which his namesake firm has earned kudos and respect with achievements in commercial and residential interior design, product development and branding since it was established in 2003.

**TROUSDALE COLLECTION ON PAGES 38-43** 

ARTISAN COLLECTION

DESIGNED BY

HOK PRODUCT DESIGN

**HOK PRODUCT DESIGN®** is a unique independent business because of its ability to identify opportunities in the marketplace based on the knowledge, research and evidence-based data available within the award winning international design firm, HOK. Verdura, designed in collaboration with Rocky Mountain Hardware, is a direct result of this valuable insight.

The idea for this new hardware collection was born when Beth Bernitt, a Floridabased senior principal at HOK, recognized a synergy between the product needs of her healthcare clients and the inherent antimicrobial properties of copper based alloys. Bernitt joined forces with Mark Banholzer, a healthcare architect in HOK's Chicago office, to design a door hardware collection that is sleek and modern to fit the aesthetic most often specified in health and wellness facilities. Rocky Mountain Hardware partnered with the team to bring this design to life by creating lost wax molds to produce the smoothest surfaces necessary for the intended application.

# Edge

Light in scale with a streamlined silhouette that's perfectly suited to today's modern spaces, the Edge Collection is perhaps our most minimalistic to date. The pared-down aesthetic exemplifies simplicity at its best, fulfilling the desire for contemporary bronze hardware that is organically pleasing yet still minimal in design. The highly customizable pieces are expertly crafted by hand using the time-honored tradition of sandcasting and are available in six different textures.

EDGE | TEXTURES

Introducing a bit of texture to your design offers added depth and dimension without compromising the minimalistic sensibility of this collection. Available in six highly textural motifs and 12 richly hued patinas, you can create a customized look that's uniquely your own.

## Designer Leather

Offered in an endless number of combinations for a design that is truly unique, this sophisticated collection is highly customizable. Start with one of our signature art-grade bronze frames in a variety of finishes, from light to dark or matte to polished. Then, choose an inlay of rich Italian leather. The end result is a mix of complementary mediums that will age together gracefully, responding to time and the environment.

DESIGNER LEATHER

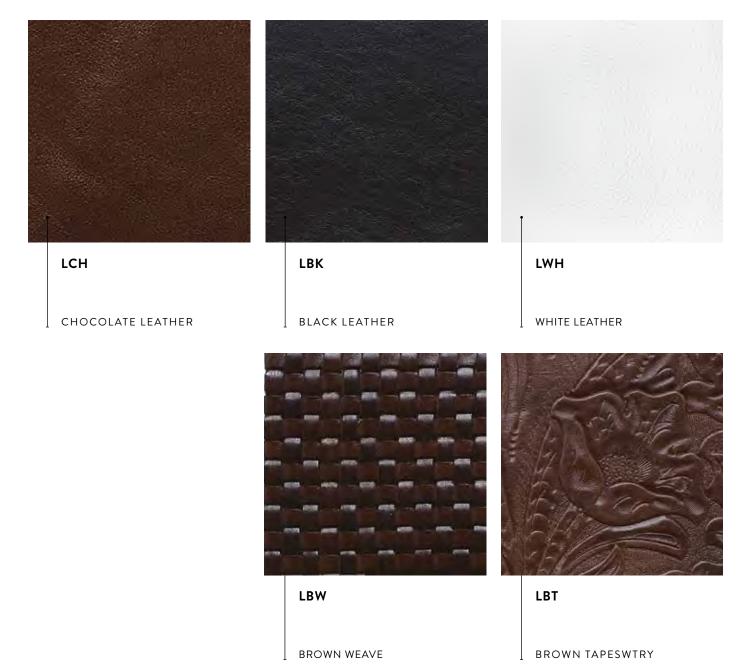

DESIGNER LEATHER

We have hand selected these eight fine Italian leather options for the Designer Collection. Select one with a complimentary patina for the frame. As is true with all natural materials, the leather will have subtle variations in color and grain which only adds to the unique character of your customized piece.

# Briggs

Designed to blend beautifully with a variety of architectural styles for an eclectic look, our Briggs Collection borrows its design aesthetic from an intriguing array of stylistic influences—from the intricate grates found in Morocco to the doorknobs of a cathedral built in the 1800s. Each design sits well in a variety of settings, making it one of our most unique assortments.

## Fleur-de-lis

A revered emblem of royalty, the fleur-de-lis remains an enduring symbol of France. Literally translated in French as "lily flower," its three distinct petals add a decorative flourish to traditional interiors. A lustrous, hand-applied patina highlights the subtle nuances of its classic design, and will only grow deeper and richer over time.

#### HOSPITALITY

## Rocky Mountain Hardware's Hospitality and Commercial Division

We can work directly with you to find the best solution for all of your projects. From small modifications of an existing collection to a completely original idea, our design and engineering team can create anything imaginable, all tailored to your exacting specifications.

Rocky Mountain Hardware has extensive experience working with large-scale projects worldwide and we welcome the opportunity to work with you to ensure your job is a success.

Contact your local Rocky Mountain Hardware Representative, call us at 888.788.2013 or email us directly at info@rockymountainhardware.com

#### rockymountainhardware.com/specialties/hospitality

## Technical Compatibility and Information

- Our current offering includes hardware that works in conjunction with RFID technology for hotel room entry doors, exterior trim for exit hardware and privacy indicator locks for public restrooms.
- Rocky Mountain Hardware can supply door hardware trim to work with commercial locks provided by other manufacturers such as Schlage, Yale, Sargent, Best and Stanley.
- Mortise locks can be supplied in a wide variety of functions including Entry, Privacy or Passage, in addition to industry specific functions such as Storeroom, Office or Classroom, and electronically controlled locks.
   Mortise locks can also be specified to accommodate a wide spectrum of backset and door thickness needs.
- All mortise locks supplied by Rocky Mountain Hardware are made in the USA and are UL listed 3 hour Grade 1 certified to ANSI/BHMA A156.13.2005.

BLUETOOTH LOCK OPTIONS

BLUETOOTH LOCK OPTIONS

## Looking for the perfect smart lock solution?

Pair your Rocky Mountain Hardware entry set with one of our Bluetooth lock options to create a state-of-the-art smartphone operated entry. Available in choice of either mortise lock or tubular deadbolt, both offer battery-powered keyless entry via Bluetooth/Wi-Fi communication and are controlled by secure, proprietary apps for ease and convenience. As with all Rocky Mountain Hardware, this offering is customizable to complement any aesthetic, resulting in beautiful and connected architectural hardware that creates a unique, memorable, and secure entry experience.

## Level Bolt by Level - Smart Tubular Deadbolt:

- Offering includes select hardware collections, either as a dead bolt/spring latch entry set or stand-alone dead bolt. Entry sets can be paired with any handle in a choice of 12 finish options.
- · All technology components are hidden inside the deadbolt pocket.
- Minimum door thickness of 13/8", thicker hardware trim may be required, see website for details. Standard Backsets: 23/8" and 23/4" only.
- Does not require any wiring through the door frame, battery powered for easy installation. Not hardwired.
- · Lock/unlock the door and grant keyless access through smartphone app.
- Level Home app offers comprehensive features including user tracking, permissions, accessibility, and more.
- $\cdot$  Compatible with both iOS and Android platforms as well as Apple HomeKit and Ring.
- Standard key provided with each lock.
- · Residential use only.
- · Customer support available from Level. See Level Bolt website for details.

## SmartEntry by Accurate – Smart Mortise Lock:

- Offering includes any hardware collection including any handle in a choice of 12 finish options.
- All technology components hidden inside the mortise pocket.
- Does not require any wiring through the door frame, battery powered for easy installation. (Hardwiring is optional.)
- · Lock/unlock the door and grant keyless access through smartphone app.
- Up to 25 users allowed per lock—each with optional and customizable accessibility permissions.
- · Compatible with both iOS and Android platforms.
- · Standard key provided with each lock.
- · Residential use only.

**KEYPAD ENTRY SYSTEM BLUETOOTH LOCK OPTIONS** 

## Smart Deadbolt by INOX:

- · Offering includes shown hardware, either as a lever set with integrated deadbolt/spring latch or a stand-alone dead bolt. Entry sets can be paired with any handle in a choice of 12 finish options.
- Minimum door thickness of 1-3/4" is required. Available in standard backsets of 2-3/8" or 2-3/4" only.
- Does not require any wiring through the door frame. No hard wiring. Powered by (4) AA batteries.
- Communicates via Bluetooth, RFID, Wi-Fi Gateway, POE Gateway
- · No devices or keys needed to secure the opening. Simply touch the reader screen to lock.
- · Lock and unlock using smartphone, RFID, passcodes, and mechanical key override or thumb turn.
- Toggle button for Passage and Privacy modes
- · Integrates seamlessly with the INOX Smart App and Access Management Portal. Manage an entire property portfolio from anywhere.
- See website for additional details and installation.

## Electronic Keypad Entry System for Electronic Lock or Strike

Our keypad locking system allows for secure keyless entry to any door without compromising your design aesthetic. These keypad escutcheons are available in 5 styles to compliment our mainline door hardware. This keypad is a separate piece from your door hardware and is intended to be mounted apart from the door.

This system works with your choice of an electronic mortise lock or electronic strike with either 12 or 24 Volt power. This offering is not compatible with SmartEntry or Level Bolt.

#### **KEYPAD ENTRY SYSTEM**

PART #	STYLE
KEY400	RECTANGULAR
KEY300	STEPPED
KEY200	METRO
KEY700	ARCHED
KEY500	CURVED

SHOWN (KEY400) RECTANGULAR IN SILICON BRONZE BRUSHED PATINA.

## Electronic Mortise Locks

can be integrated into all Rocky Mountain Hardware mortise lock entry sets. The power must be hardwired through the door. This setup requires a power transfer to the door that can be accomplished with an electrified hinge which can be incorporated into any Rocky Mountain Hardware concealed bearing hinges. Doors must be prepped for wiring transfer.

## Electric Strikes

can be integrated into all Rocky Mountain Hardware mortise lock sets. This application does not require the power transfer through the door except in double door applications where the strike will be mounted on the inactive door. Single doors will need to have power hardwired from the keypad to the jamb to operate the electric strike.

PLEASE CALL US FOR MORE DETAILED INFORMATION ON THIS OPTION, 888.788.2013.

## Lock Functions

#### **ENTRY (SINGLE CYLINDER)**

This is a locking set with operable handles that has a keyed cylinder on the exterior side of the door and usually a turn piece on the interior side (typically used on primary exterior doors).

#### **ENTRY (DOUBLE CYLINDER)**

This is a locking set with operable handles that has a keyed cylinder on both sides of the door (typically used on primary exterior doors).

#### **DUMMY-SINGLE**

This is a set with an inoperable handle on one side of the door (typically in conjunction with roller latches, flush bolts or surface bolts).

#### **DUMMY-FULL**

This is a set with inoperable handles on both sides of the door (typically in conjunction with roller latches, flush bolts or surface bolts).

#### PASSAGE

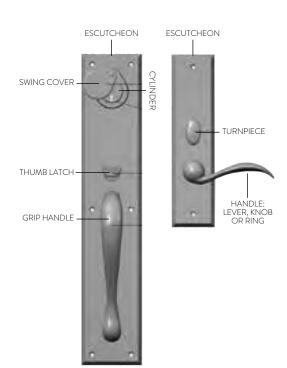

This is a non-locking set with operable handles (typically used on doors that do not require security or privacy such as closets, laundry or utility rooms, pantry, mechanical rooms and so on).

#### **PATIO**

This is a locking set with operable handles that is locked by a turn piece from the interior side, but has no keyed access from the exterior (typically used on secondary exterior doors).

#### PRIVACY (MORTISE BOLT OR MORTISE LOCK)

This is a locking set with operable handles that is locked by a turn piece from the interior side and can be unlocked by an emergency release key from the exterior side (typically used on bedroom and bathroom doors).

#### PRIVACY (SPRING LATCH)

This is a locking set with operable handles that is locked by a push button on the escutcheon from the interior side of the door and can be unlocked by an emergency release key from the exterior side (typically used on bedroom and bathroom doors).

#### PUSH/PULL

This is a set with inoperable grip handles and/or escutcheons. The set can have locking capacity in single cylinder, double cylinder or patio applications and is available in full or single dummy as well (typically used for commercial applications).

#### **LOCK TRIM**

Lock Trim is the portion of the set usually attached to the surface of the door and consists of these parts:

#### **ESCUTCHEON**

Back plate that attaches to the door.

#### HANDLE

The portion of the set you grab to pull or rotate. The handle options are grips, levers, knobs or ring pulls.

#### SWING COVER

The flap that covers the cylinder or the emergency release access.

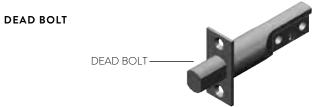

#### THUMB LATCH

This piece retracts the latch bolt on a thumb latch entry lock set.

#### **TURN PIECE**

This piece operates the dead bolt or mortise bolt on the interior side of a locking set.

Lock Mechanisms are the portion of the set operated by the handles, cylinders, thumb latches and turn pieces:

A locking mechanism that is separate from the latching mechanism in a door set. A dead bolt can be locked by a key or turn piece.

Rocky Mountain Hardware can provide separate dead bolt trim that is used above a handle set or can incorporate the dead bolt and handle trim onto the same escutcheon.

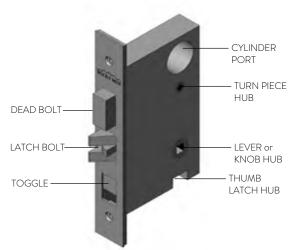

A latching mechanism operated by the handles.

A locking mechanism that is separate from the latching mechanism and is operated by a turn piece. It is usually used for interior applications to provide privacy on bedroom and bathroom doors, and is typically paired with a spring latch.

#### **MORTISE LOCK**

This mechanism integrates the locking and latching mechanisms into a single cartridge style lock. The mortise lock is available in a variety of functions such as entry, privacy, passage and so on.

Cylinders are the portion of a lock where the key is inserted to lock or unlock the set. There are several different kinds common to Rocky Mountain Hardware sets:

#### MORTISE CYLINDERS

Mechanisms that are threaded into mortise locks, secured by a set screw through the edge of the lock and vary in length for different door thicknesses.

#### **RIM CYLINDERS**

Mechanisms used in dead bolts and are mounted with screws from the opposite side of the door. They do not vary in length, but the mounting screw and tailpiece length varies according to the door thickness.

## Multi-point Lock Mechanisms

Mechanisms that latch the door at several points along the length of the door instead of a single point in close proximity to the handle. Multi-point locks are provided with the French doors made by most of the major window manufacturers. Due to the variety of multi-point sets available, Rocky Mountain Hardware recommends that a copy of the existing lock trim or provide a completed multi-point information sheet, so our trim can be machined correctly to match the lock in the door.

#### **AMERICAN OR U.S. CYLINDERS**

Refers to the type of cylinder used with several types of multi-point lock sets. Thesecylinders are attached to the escutcheon and do not vary in length, but the tailpiece length varies according to the door thickness.

#### **EUROPEAN PROFILE CYLINDERS**

275

Another type of cylinder used with multi-point lock sets. These cylinders slip through the exterior escutcheon, the door and the interior escutcheon and are held in place by a set screw through the edge of the lock and vary in length for different door thicknesses.

## Additional Terminology

#### **ACTIVE DOOR**

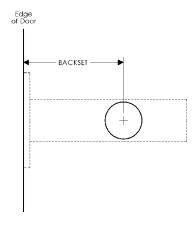

The primary door in a pair of doors and typically has an operable handle set.

#### **AUTO- FLIP**

Exterior handle will remain inoperable after lock is engaged until the toggle switch is manually reversed on the mortise lock face.

#### **BACKSET**

Indicates the lock location relative to the edge of the door.

#### **BUTT HINGES**

Hinges with one leaf mortised to the jamb and one leaf mortised to the edge of the door.

#### **CABINET ROSES**

The back plates behind the cabinet knob or pull.

#### **CLAVOS**

Decorative nails typically applied to the surface of the door.

#### **EDGE PULLS**

Used to retrieve a pocket door from the pocket.

#### **EMERGENCY EGRESS**

When the lock is engaged, operating the interior handle will simultaneously retract both the latch bolt and the deadbolt. Feature not included with Grip-to-Grip mortise sets.

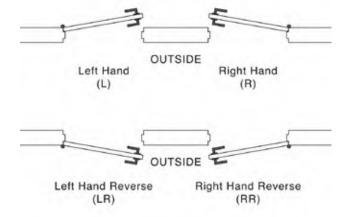

#### EMERGENCY RELEASE

This term refers to the capability of a lock to be unlocked from the exterior side in case of an emergency situation. This is an aspect of most interior privacy lock sets. Rocky Mountain Hardware provides an emergency release key with our privacy lock sets.

#### FLUSH PULLS

Recessed pulls used on sliding doors such as pocket or bypass doors. Handing (hinged doors) Indicates where the door is hinged and the direction it swings. Please see chart below.

#### **Hinged Door Handing**

#### PLEASE NOTE:

- 1. Handing of the doors is always determined from the outside.
- 2. The outside of an exterior door is the street/entrance side.
- 3. The outside of a room door is the hall side.
- 4. The outside of a closet door is the room or hall side.

### Lever Handing

#### **INACTIVE DOOR**

The secondary door in a pair of doors. The inactive door swings or slides like the active door and is often secured with flush or surface bolts and typically has inoperable handles.

#### ORNAMENTAL HINGE STRAP

A decorative piece of metal applied to the surface of the door to mimic a strap hinge.

#### STRAP HINGES

Hinges that have one leaf applied to the surface of the jamb and one leaf attached to the surface of the door.

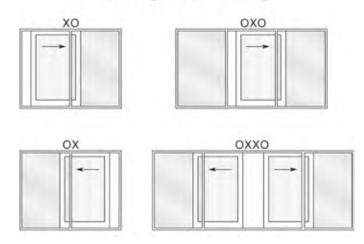

#### SPRING ASSIST

Each handle Rocky Mountain Hardware produces has an additional spring attached to the handle and the escutcheon that returns the lever, knob or ring to the neutral position; this mechanism eliminates sagging handles.

#### HANDING (SLIDING DOOR)

Indicates the direction the door slides. Please see chart below.

#### Sliding Door Handing

#### PLEASE NOTE:

- 1. All views are shown from the exterior side.
- 2. Active Panel is the locking panel and its location must be verified.
- 3. Must indicate active side.

Rocky Mountain Hardware uses the same Schlage C key style for all of these cylinders so that all can be keyed to the same key.

## Follow these Steps to Customize our Door Hardware Perfectly to Your Style

## Select an escutcheon (back plate) style.

We have over 25 styles to choose from. Look through these pages to see pictures of each style in setting as well as simple product shots on white background. Each style has many different sized plates to carry your selected design from the entry to the bathroom. See pages 24-165.

# 2

## Select a handle.

We have many handle options, including grips, levers and knobs. Grips are typically used on larger entry doors, while levers and knobs can be used for either entry or interior doors. Grips and levers or knobs are often mixed on the same project to accommodate different needs. See pages 166-195.

## Select a patina.

We have 12 patina finishes-with two different base alloys. Our silicon bronze finishes are more copper/brown in appearance, while our white bronze finishes are more pewter/silver in appearance. See pages 16-17.

If you selected our **DESIGNER COLLECTION**, you will also need to select a choice from either our Italian leather (pages 68-69) or our bronze texture options (pages 60-61).

If you selected our **EDGE COLLECTION**, you will also need to select a texture option (pages 34-35).

5

Contact your local authorized Rocky Mountain Hardware dealer to help carry your design selections throughout your project. If you do not already know your local dealer, visit our site to find a local dealer.

## Below is a list of details that your dealer will need to finalize for your order.

- Number and location of doors-then the following information for each door.
- · Handing of each door (see diagram on page 264).
- Door stile width. The stile is the vertical flat portion of the door where the hardware mounts. The dimension needed is from the edge of the door to where the flat portion ends/molding or other detail begins.
- Door Thickness.
- Backset
- Are doors already bored for hardware? If yes, you will need measurements
  of these holes. (If not, boring instructions are included with the hardware.)

Rocky Mountain Hardware stands behind all of our bronze products with a lifetime guarantee on material and workmanship. In addition, the internal mechanisms, including all locks, latches, etc., are guaranteed for 50 years from the date of sale to the original user. Rocky Mountain Hardware will repair or replace the defective product or parts that fall within these guidelines. When necessary, a proof of purchase dated within the warranty period may be required. The patina finish applied to our bronze products is known as a "living finish" which means it will change with time, touch, climate, etc. Because each product will be exposed to a varying set of conditions, we do not warranty the finish of our products. Additionally, we do not warranty the leather as it will also change with the elements of its surroundings.

Rocky Mountain Hardware will not assume liability for any labor charges regarding the removal or reinstallation of the products; nor will we cover any freight, postage, or handling expense related to the product. Damages caused by accident, misuse, abuse, or improper installation are not covered by this warranty.
